Professional Summary

Experienced AI Consultant and Product Leader with 15+ years shaping and delivering AI, Machine Learning, Generative AI, and optimization solutions in enterprise environments. Expert in defining product vision, scope, and roadmaps; translating complex business requirements into actionable development work; and leading end-to-end AI product lifecycles from opportunity identification and scoping through valuation, iterative delivery, and value realization. Skilled communicator and collaborator who facilitates stakeholder sessions, builds trust with business and technology leaders, grooms backlogs in Agile/SAFe settings, and delivers executive-level presentations to drive innovation, efficiency, and strategic success. Proven impact: reduced manual effort by up to 50%, accelerated decision-making, and enabled scalable AI adoption.

Core Skills

- **AI & ML Technologies**: Generative AI, Machine Learning, Traditional AI, Agentic AI, Predictive Analytics, Optimization, AI Workflow Automation
- **Product & Consulting**: Product Vision & Roadmaps, Business Requirements Translation, End-to-End AI Lifecycle, Opportunity Scoping & Valuation, User Stories, Backlog Grooming & Prioritization, JIRA, Confluence
- **Delivery & Methodologies**: Agile/SAFe Principles, Cross-Functional Collaboration (Business & Technology), Stakeholder Facilitation, Executive Communication & Presentations
- **Tools & Practices**: AWS (SageMaker, S3, Glue), Appian (Certified), SQL, Dashboard Prototyping, Jira/Confluence Alignment, Value Definition Frameworks
- **Leadership**: Customer Relationship Management, Problem-Solving Ambiguous Challenges, Systems Thinking, Confidential/Sensitive Information Handling

Professional Experience

Solomon Associates (Munich Re) – Digital Transformation Product Lead / Appian Product & Project Manager | 2021 – Present

- Led Generative AI and ML consulting projects as the primary lead, shaping product vision and roadmaps while scoping real business problems and guiding cross-functional

teams (engineering + business) to deploy scalable, reliable AI tools that supported 200+ users and delivered ongoing efficiency improvements.

- Ran targeted stakeholder workshops to quickly unpack challenges, get alignment on priorities, and keep backlogs groomed and SAFe-ready across 5+ active projects at once—helping teams adapt fast when business needs shifted.
- Owned end-to-end delivery for mid-to-complex AI initiatives: spotted opportunities, sized value, iterated through Agile cycles, launched successfully, and followed up on optimization—onboarding 200+ users and locking in 30%+ efficiency gains long-term.
- Put together and presented executive updates, status decks, and clear value stories to senior leaders, breaking down technical details into business terms, earning trust, and handling all sensitive info with care.
- Used value frameworks to assess and rank AI efforts, cut down on feature creep, and re-prioritize dynamically based on capacity and changing goals—keeping projects focused and resources used smartly.

Cognizant Technology Solutions – Project/Product Manager, Strategy & Analytics Lead | 2017 – 2020

- Owned ML-based risk prioritization and analytics solutions as product lead, translating ambiguous business needs into clear requirements, user stories, and prioritized roadmaps that accelerated release cycles by 40–50% across testing and deployment processes.
- Acted as key liaison for business and technology stakeholders on multiple concurrent projects, facilitating alignment sessions, solving complex challenges through systems thinking, and driving measurable efficiency improvements while adapting to shifting priorities.
- Delivered executive-level presentations and communications to senior audiences, simplifying technical concepts into compelling business value narratives that secured buy-in and supported decision-making.
- Collaborated closely with data science and engineering teams in Agile environments to iterate on features, groom backlogs, and ensure timely delivery of high-impact outcomes aligned with strategic goals.

Cognizant Technology Solutions – Senior Techno-Functional Business Analyst | 2008 – 2017

- Built and prototyped analytics dashboards from large datasets, enabling data-driven operational insights and helping stakeholders act on complex information to improve decision-making and efficiency.

- Translated business requirements into technical specifications and development plans, supporting beta testing, feedback integration, and iterative prioritization that contributed to successful enterprise software rollouts.
- Conducted data analysis and advanced analytics to identify opportunities, collaborating with cross-functional teams to refine solutions and deliver value in fast-paced environments.

Cognizant Technology Solutions – Techno-Functional Analyst | 2005 – 2008

- Led testing cycles and supported business development with demos, RFPs, and use cases for data/analytics-focused enterprise solutions.

Education

MS, **Business Analytics (Data Science)** – University of Texas at Dallas – 2022
Bachelor's, **Computer Science** – Osmania University - 2005
Appian Certified Developer | UTD ML Certified
